John Slattery Hygienic Applications Ltd., Offer High Performance Solutions for the Biomedical & Life Sciences Pharmaceutical Sectors.

SEAMLESS RESIN FLOORING:

Healthcare & Pharmaceutical e.g. hygienic & clinical. Safe clean environments, seamless flooring has been an integral part of JSHA Ltd., since 2004. The focus of our market has been the Biomedical Industry, from research facilities to Pharmaceutical production areas.

Special Features & Benefits:

Chemical Resistant
Durable
Decorative
Fast Cure Systems

- Epoxy Resin & Screeds
- Polyurethane
- Polyaspartic
- MMA
- UV Resin, Fast Cure

ANTI-MICROBIAL PVC WALL CLADDING:

For reasons of shortened construction times, durability, no painting or pinholes & reduced maintenance costs, the Industry has been looking to PVC Wall Cladding as a viable product for interior finishes in areas where sustainable finishes are critical.

Special Features & Benefits:

Durable
Class "0" Fire Rating
Chemical Resistance
Thermoformed on all corners

- Anti-microbial:
- Inhibits growth of MRSA, E.coli, Salmonella
- & Mould by 99.9%
- Control bacteria 24/7

"Antimicrobial" is simply the term used to describe something that has the ability to resist growth of microbes, including bacteria, moulds, fungi & many others.

ANTI-MICROBIAL WALL & CEILING COATING:

Wall condition, end use, site problems & budget must be considered when choosing a wall system. Using experience & knowledge of the Industry, JSHA Ltd., ensures all wall projects are thoroughly discussed to ensure the correct system & options are chosen.

Special Features & Benefits:

Water-based Low VOC
Decorative
Complies with Current Legislation
Easy Clean & Chemical Resistant
Fast Drying

- Epoxy
- Polyurethane
- Fibreglass Reinforced

We are specialist supplier & installer of our products, which are designed to meet the challenges & stringent requirements of the Biomedical & Research fields.

- Crash Rails
- Corner Protection
- Door Protection
- Wall Protection

- HTC Superfloor™ Platinum
- HTC Superfloor™ Gold
- HTC Superfloor™ Silver
- HTC Superfloor™ Bronze

- Lead-lined
- Steel-lined
- Anti-barricade Doors
- Anti-microbial Doors
 - Acoustic Doors
 - Fire Rated
 - Non Fire Rated

WALL PROTECTION SYSTEMS:

Maintaining finished surfaces that withstand the scrutiny required for GLP & GMP facilities can be a costly budgetary consideration. Our Wall Protection Systems offer door & wall protection against surface impact & thereby reduce maintenance costs.

Special Features & Benefits:

Reduces Repair & Maintenance
Vast Range of Colours & Profiles
Chemical, Fungus & Bacteria Resistant
Maintains the overall appearance of interior throughout its life.

POLISHED CONCRETE:

Concrete floors deserve better treatment than just being walked on. A HTC Superfloor™ will really make you appreciate the advantage of having concrete as an exposed floor surface. By installing a HTC Superfloor™ you transform your construction concrete to a usable, dust-free & hard floor that becomes more resistant to wear & traffic than any other floor on the market.

Special Features & Benefits:

Environmentally Sustainable
60% Lower Life Cycle Costs than traditional flooring solutions.
Lower Vibration on Vehicles
Proven an excellent choice of floor when it comes to high demand of ESD.

BIODOORS:

BioDoors are available for installations where cleanliness is imperative. This is an antimicrobial PVC covering which is 2.5 mm thick, creating an antimicrobial coating which will last for the life time of the door set (even if scratched). An antimicrobial coating not only has antibacterial qualities but also prevents the growth of mould and fungus. Vision panels can be supplied with standard bolection beading, flush beading, v-groove glazing & full flush glazing.

Special Features & Benefits:

Inhibits MRSA, E.coli, Salmonella & mould by up to 99.9%
Reduces cross contamination in any environment
Continues to control bacteria 24/7
Easy wipe-clean surfaces
